Where AI-made music meets the people who love it

AI Stage is a streaming platform built for AI-generated and independent music — honest labelling, always-on radio, live shows and listening rooms, plus a real release toolkit for the artists who make the tracks.

STORY BEHIND THE SONG

THE FUTURE OF AI MUSIC IS HERE

A dedicated home for AI artists.

The major streaming platforms are being flooded with AI-generated music. As volumes continue to grow, the traditional music industry is already changing the rules.

Some platforms, distributors and publishers are introducing restrictions on AI-created music, and we expect these requirements to become much tougher as the industry evolves.

This is where AI Stage comes in.

AI Stage is built specifically for the new generation of AI artists. We are more than a streaming platform — AI Stage is becoming a meeting place where AI artists can showcase their music, build their identity, connect with listeners and grow an audience.

As access to traditional platforms becomes more challenging, having a dedicated home for AI music will become increasingly important.

And this is only the beginning. AI Stage is building an ecosystem for AI artists and listeners — bringing together music, discovery, artists, promotion and community.

AI music isn't going away. It's growing.

The question is no longer whether AI music will become part of the music industry. It already is.

AI Stage — Where AI Artists Meet Their Audience.

FOR LISTENERS

Hear it first.

Everything new, surfaced fairly — not just what already has a million plays.

13 always-on stations

Global, Afrikaans, English, Country, Pop, Rock, Gospel, Electronic, Chill and more — each with its own AI DJ personality.

AI DJ on request

Describe a mood in plain words and get a hosted set with voice links, or a silent mix if you'd rather just listen.

Listening rooms

Play in perfect sync with friends, chat, react and build the queue together — then read the recap afterwards.

Live shows and replays

Watch artists broadcast live with chat, polls and tipping, or catch the archived replay on demand.

Offline and installable

Install AI Stage like an app, download tracks for the road and keep playing when the signal drops.

Honest AI labels

Every release carries a visible AI-origin badge, tool disclosure and provenance — no guessing what you're hearing.

FOR ARTISTS

Release like a label.

Upload, protect and promote your catalogue from one portal — no distributor required.

Live in under 5 minutes

From picking your file to a playable page: upload, declare, publish. Most releases are visible on the platform in less than five minutes.

Uploads that survive bad signal

Resumable uploads up to 100 MB per track, WAV or MP3/AAC, with ISRC, UPC and tag import handled for you.

Duplicate protection

Audio fingerprinting checks every upload against the catalogue before it goes live, with waveform match evidence.

SmartLinks

One shareable link per release with pre-save, rich social previews and per-click analytics.

Story Behind the Song

Our signature section: the context, the process and the meaning that turns a play into a real fan.

Live Studio

Go live, invite guests, run polls, take tips, moderate chat and publish the replay when you're done.

Real numbers

Plays, saves, shares, countries, pinned top songs, credits and splits, plus payout tracking in one portal.

COMMUNITY & DISCOVERY

Music is better with people.

Charts, conversation and context — the parts that turn a catalogue into a scene.

Chat everywhere it matters

Every listening room has live chat and reactions, and every song has a comment thread where fans and artists talk in the open.

Weekly featured artist

One artist takes the spotlight each week on the home page — chosen from real listening signals, not paid placement.

Song stories and lyrics

Read the Story Behind the Song and follow full lyrics while the track plays — context and words in one place.

Monetisation coming soon

Artist payouts, tipping and licensing are on the roadmap. Build your audience now; earning tools arrive next.

Weekly Top 20, 50 and 100

Fresh charts every week across the whole catalogue, so new releases can climb on merit instead of back-catalogue momentum.

Public artist profiles

A shareable page for every artist: bio, pinned top songs, releases, canvases, verification badge and links.

AI helper on every page

A built-in AI assistant answers questions about uploads, declarations, playback and your account instantly — and hands you to a real person the moment it should.

Starting out

EVERYONE

3 months of Premium free on signup. No card needed to start listening.

LISTENERS

Premium keeps radio, rooms, AI DJ, offline and live shows unlocked at R19.99 per month.

ARTISTS

Your first 20 songs upload free, then R10.00 per song. Invitation-only during soft launch.

Take the stage.

Listeners: press play. Artists: request a soft-launch invite code.
